About the Coalition

The Region Healthcare Coalitions were established in 2012, in response to the US Department of Health and Human Services and Office of the Assistant Secretary for Preparedness and Response guidelines for Healthcare System Preparedness.

The Region Healthcare Coalitions are multiagency-coordinating groups that provides a collaborative network of healthcare organizations, Hospitals, EMS, Nursing Homes, Dialysis, Primary Care Providers, Public Health, Emergency Management, Public Safety, Non-profit Organizations, and many more.

Although the purpose, mission goals, and partner types are the same for each coalition, the Region D and N Healthcare Coalitions will remain separate entities, each with it's own geography, special attributes and funding stream!
